

CompScience

Workplace Video + AI = Lower Injury Rates

CompScience offers a new way to improve safety with Risk Assessments and the Intelligent Safety Platform.

These tools leverage a company's existing data and offer unique insights to both current client and prospects.

The result? Lower costs and higher productivity whether bundled with workers' compensation insurance or as a software service.

Partners

The CompScience program really works by itself. We were able to take the quantified risk data, choose from the proposed solutions, and reduce our risk exposure very quickly.

Michelle McCurry

VP of Risk Management, Propak Logistics

Target Industries Nationally in the US
